Unica Collaborate V12.1.7 Release Notes

Contents

Chapter 1. Release Notes for version 12.1.7

Contains information about new features, defect fixes, and known issues in Unica Collaborate that HCL releases as part of a scheduled software release.

System Requirements and Compatibility

Unica Collaborate operates as part of the Unica suite of products. Unica Collaborate, version 12.1.7 requires Unica Platform, version 12.1.7 and Unica Campaign, 12.1.7.

Upgrade Paths

Unica Collaborate supports the following upgrade paths:

- 12.1.x → 12.1.7
- 12.1.0.x → 12.1.7

Customers on versions earlier than 8.6.x must:

- perform a Fast Upgrade from existing version to version 8.6.0 (for more information, see *HCL Unica 8.6.0 Fast Upgrade Guide*).
- perform a Fast Upgrade from version 8.6.0 to version 12.1.0 (for more information, see *HCL Unica 12.1.0 Fast Upgrade Guide*).
- perform an in-place upgrade from version 12.1.0 to version 12.1.7.

Customers on versions earlier than 11.1.x.x can:

- perform a Fast Upgrade from existing version to version 12.1.0 (for more information, see *HCL Unica 12.1.0 Fast Upgrade Guide*).
- perform an in-place upgrade from version 12.1.0 to version 12.1.7.

Customers on versions 11.1.x.x/12.0.x.x can use one of the following options for upgrade:

- **Option 1**
  - perform an in-place upgrade from existing version to version 12.1.0.
  - perform an in-place upgrade from version 12.1.0 to version 12.1.7.
- **Option 2**
  - perform a Fast Upgrade from existing version to version 12.1.0 (for more information, see *HCL Unica 12.1.0 Fast Upgrade Guide*).
  - perform an in-place upgrade from version 12.1.0 to verison 12.1.7.

Where to find complete system requirement and compatibility information

For a list of Unica Software product versions compatible with this product and a list of third party requirements for this product, see the Recommended Software Environments and Minimum System Requirements document.

Where to find report package reference documentation

Reference documentation for report packages is no longer available on the documentation server where the PDF versions of the product documentation are posted. You can access the reference documentation for report packages after you install the reporting schemas on the machine where the Unica Platform is installed. The reference documentation is in a subdirectory of the Cognos10 directory under the report package installation.

Google Chrome and Microsoft Edge configuration

Recently, the browsers Google Chrome and Microsoft Edge updated a security fix and this security fix affects the access of Unica applications. We have received some issues from our customers like:

- issues with UI
- unable to edit flowcharts
- getting logged out from Unica

These issues are observed due to the change of behavior in browsers after applying the security fix. Applying the security fix automatically enables **Origin-keyed Agent Clusters by default**. If the setting **Origin-keyed Agent Clusters by default** is enabled automatically, it prevents changes in document referrer and domain values so that malicious websites cannot execute any type of impersonation. The setting **Origin-keyed Agent Clusters by default** existed earlier as well, but was not enabled by default.

If you update Google Chrome or Microsoft Edge to the latest version, you will observe the earlier mentioned issues. Because of how Unica is designed and because the Unica suite is deployed over multiple JVMs, it is essential that you disable the **Origin-keyed Agent Clusters by default** setting for Unica to function correctly and to provide a good user experience.

As a solution, we recommend that you perform the steps mentioned in the following Knowledge Base article: https://support.hcltechsw.com/csm?id=kb_article&sysparm_article=KB0107185.

📝 **Note:** The update to Microsoft Edge browser is very recent and the Knowledge Base article is not yet updated for the Microsoft Edge browser.

The CliffsNotes solution is as follows:

1. Open your browser and navigate to one of the following URLs based on your browser:
   - **Google Chrome**: chrome://flags/#origin-agent-cluster-default
   - **Microsoft Edge**: edge://flags/#origin-agent-cluster-default
2. From the dropdown of the highlighted parameter **Origin-keyed Agent Clusters by default**, select `Disabled`.
3. At the bottom of the page, click the **Apply Changes** button.
4. Log out of Unica applications, log back in, and verify if everything is working as expected.

New Features and Changes

There were no new features introduced in Unica Collaborate 12.1.7.

The following libraries were updated in 12.1.7:

Library name	Version
spring-aop	5.3.29
spring-beans	5.3.29
spring-context-support	5.3.29
spring-context	5.3.29
spring-core	5.3.29
spring-expression	5.3.29
spring-jdbc	5.3.29
spring-orm	5.3.29
spring-tx	5.3.29
spring-test	5.3.29
spring-web	5.3.29
spring-webmvc	5.3.29
spring-messaging	5.3.29
spring-websocket	5.3.29
spring-security-acl	5.7.11
spring-security-config	5.7.11
spring-security-core	5.7.11
spring-security-ldap	5.7.11
spring-security-openid	5.7.11
spring-security-taglibs	5.7.11
spring-security-web	5.7.11
spring-security-crypto	5.7.11
guava	32.0.1
bcprov-jdk18on-1.74	1.74

Fixed Defects

The following table lists the fixed defects of Unica Collaborate in version 12.1.7

Table 1. Fixed Defects in 12.1.7

ID	Description
HMA-356975	CVE fixes.

Known Issues

In version 12.1.7, the known issues for Collaborate version 12.1.2 are applicable.

Known Limitations

In version 12.1.7, the known limitations for Collaborate version 12.1.2 are applicable.
