# Chapter 1. Release Notes

Contains information about new features, defect fixes, and known issues that HCL releases as part of a scheduled software release.

## System requirements and compatibility

Unica Content Integration operates as part of the HCL Marketing Software suite of products. Unica Content Integration requires Unica Platform 12.1.

This section provides the following information for this release of Unica Content Integration:

- Where to find system requirement and compatibility information
- Changes in support for third-party software

Unica Content Integration supports 64-bit operating systems only.

### **Where to find complete system requirement and compatibility information**

For a list of HCL Marketing Software product versions compatible with this product and a list of third-party requirements for this product, see the Unica Recommended Software Environments and Minimum System Requirements document.

## Unica Content Integration Overview

- Supports out-of-the-box integration with Adobe Experience Manager and HCL DX.
- Provides development framework to extend it to any other compatible CMS.

## New Features in version 12.1

## SDK enhancements

Unica Content Integration version 12.1 has come up with an enhanced SDK to facilitate easy integration with any content management system. Enhanced SDK provides more ease for the development as well as deployment of plugins for any content management systems.

Enhanced SDK includes:

- Improved and simplified contract for integrating with REST services.
- Centralized management of service declarations for all plugins.
- API to invoke ad hoc HTTP calls on content management system (without service declaration).
- Ease of plugin deployment.

## Known Issues

The following table lists the known issue of Unica Content Integration in version 12.1.

| Issue ID   | Description   |
|------------|---|
| HMA-308283 | <p>Default API security filter is available on fresh installation.</p> <p>As a result of this fix, a default API security filter namely, <b>API Security Filter</b>, will be available under "<b>Unica Platform   Security   API management   Unica Content Integration</b>" configuration node after fresh installation.</p> <p>Hence, no additional filter is required to be setup as part of post installation. procedure.</p> |

## Known Limitations

- **Content Support** - For the 12.1 release, the content support is limited only to images.

## Before you contact HCL technical support

If you encounter a problem that you cannot resolve by referring the documentation, your company's designated support contact can log a call with HCL technical support. Use these guidelines to ensure that your problem is resolved efficiently and successfully.

If you are not a designated support contact at your company, contact your HCL administrator for information.

### Information to gather

Before you contact HCL technical support, gather the following information:

- A brief description of the nature of your issue.
- Detailed error messages that you see when the issue occurs.
- Detailed steps to reproduce the issue.
- Related log files, session files, configuration files, and data files.
- Information about your product and system environment, which you can obtain as described in "System information."

### System information

When you call HCL technical support, you might be asked to provide information about your environment.

If your problem does not prevent you from logging in, much of this information is available on the **About** page, which provides information about your installed HCL applications.

You can access the **About** page by selecting **Help > About**. If the **About** page is not accessible, check for a `version.txt` file that is located under the installation directory for your application.

### Contact information for HCL technical support

For ways to contact HCL technical support, see the HCL technical support website:
