Chapter 1. Release Notes

Contains information about new features, defect fixes, and known issues that HCL releases as part of a scheduled software release.

New features and changes in version 12.1

This section describes the new features and changes introduced in the 12.1 version of Unica Platform.

Unica Platform now supports JBoss and Apache Tomcat®

Unica Platform now supports JBoss and Apache Tomcat application servers.

Upgrade paths

1. Supported upgrade path via installers: 11.1 -> 12.1 and 12.0 ->12.1.
2. Customers at version 11.0 or below should use fast upgrade to version 12.1, or first upgrade to version 11.1.

Renaming of Unica products

BIRT reporting is now named as Unica Insights.

Unica Asset Picker is now named Unica Content Integration.

New Unica application

Unica Platform now holds configuration of new applications Unica Journey and Unica Deliver.

Fixed defects

This section describes the fixed defects in the 12.1 version of Unica Platform.

Issue ID	Description
HMA-305850	Automatic Datasource creation is failing for UnicaPlatformDS - Linux/AIX Specific
HMA-307443	Not able to install only Unica Insights component
HMA-308051	Installation of Content Integration in a distributed setup failed with error.

Known issues

This section describes the known issues in the 12.1 version of Unica Platform.

Issues	Description
HMA-313650	<p>Platform Scheduled flowcharts are not getting executed after upgrade.</p> <p>Use the quartzjobtool to update scheduler jobs. This is a required step. If this upgrade tool is not run, any existing scheduled job will fail to start. The quartzjobtool is in the tools\bin directory under Unica Platform installation. Run this utility from the <code>tools\bin</code> directory.</p> <p>Example command (Windows): quartzjobtool.bat</p> <p>Example command (Unix): ./quartzjobtool.sh</p>
HMA-312527	An error occurs during an onplace upgrade from 11.1 to 12.1 with installer. This can be ignored.
HMA-312525	<p>The name of configuration root node is not updated during upgrade from version 11.1 to version 12.1.</p> <p>Workaround</p> <p>It can be resolved by running the following query on Unica Platform database:</p>

	<pre>UPDATE USM_CONFIGURATION set DISPLAY_NAME = 'HCL Unica' WHERE INTERNAL_NAME='Affinium' ;</pre>
HMA-304803	Connection read-only mode is not enforceable after the connection has been established." No impact on application side. These can be ignored.
HMA-285272	When user tries to view the license details, if there is no connectivity with the License server, the page will show a message "Internal system error." Instead of a detailed message.
HMA-312350	When user enters invalid URL or credentials or some information is missing, the license registration page shows message «#Internal system error#» instead of a detailed message. User must re-open the page and try to enter URL and credentials again.
HMA-312224	After upgrade from 12.0, BIRT nodes remains in the Configuration setting. It should be ignored.
HMA-306114	<p>Distorted Unica menu bar displays in IE, when the browser is not miximized and the Settings menu bar displays more items than that can fit in the browser window</p> <p>Workaround: To display the menu bar correctly, mouse over the Help top menu or the notification envelope to provide menu.</p>
HMA-244862	Client polling execution thread control is required.
HMA-276643	Internal users not able to login in case of LDAP server is unavailable in Unica Platform.
HMA-75443	JMAT: Uninstaller with no option runs in silent mode when product was installed in console mode on Windows.
HMA-186137	LDAP sync fails intermittently. The sync never works until the server is restarted.
HMA-267374	Platform: Cannot resize back to original size for portlet

HMA-222131	Issues in syncing OD user roles when Audit Event Logging is enabled
HMA-268210	Usability - Title missing for SAML NVP attribute for user
HMA-287668	<p>In JBoss, the following warning is logged on JBoss console: Warning "Failed to define class com.sun.jersey.api.json.JSONWithPadding in Module "deployment.Campaign.war:main"</p> <p>This can be ignored.</p>
HMA-295542	When editing Roles and permissions, session gets aborted with error message "Your request processed successfully, but the server is unable to send the success message because you submitted the data more than once" if an user clicks on save button more than once.
HMA-305244	<p>Jboss : Getting TimedOut error while deploying Platform war</p> <p>This is resolved by setting java option -</p> <p>Djboss.as.management.blocking.timeout=3600</p>
HMA-300725	<p>For MariaDB with WAS setup, the following error is a known issue. This can be ignored as in MariaDB JDBC client, the <code>MariaDbConnection</code> class do not support the implementation of <code>setTypeMap()</code> API of JDBC Connection interface.</p> <pre>J2CA0081E: Method cleanup failed while trying to execute method cleanup on ManagedConnection WSRdbManagedConnectionImpl@425c7a23 from resource UnicaPlatformDS. Caught exception: com.ibm.ws.exception.WsException: DSRA0080E: An exception was received by the Data Store Adapter. See original exception message: Not yet supported. with SQL State : null SQL Code : 0</pre>

Known limitations

This section describes the known limitations in the 12.1 version of Unica Platform.

Issues		Description
Notifications messages for License consumption are not localized.	HMA-312486	Notifications about licensing consumption, overdraft and term expiration are sent in English only
Limitations on automatic synchronization of external users		<p>When Unica is configured to integrate with a Windows Active Directory or LDAP server, users and groups are synchronized automatically at pre-defined intervals. This automatic synchronization has limited functionality.</p> <p>Automatic synchronization updates user attributes only. As group membership changes such as adding, removing, or changing members in a group require administrator oversight, import of these changes is confined to the manual synchronization process by default.</p> <p>You can force a full synchronization of all users and groups by using the Synchronize function in the Users area of Unica. No additional configuration is required.</p> <p>However, you can also use a hidden configuration property to include group membership changes in the automatic synchronization process. For details, contact Services.</p>

<p>Administration users can edit their own permissions</p>	<p>DEF 184911</p>	<p>Users with the Unica Platform AdminRole, such as the asm_admin user, can add the PlatformAdminRole to their own accounts, which would increase their access across partitions. It is an authorization issue to allow users with administration permissions to edit their own permissions.</p>
