Chapter 1. Director Release Notes

Contains information about new features, defect fixes, and known issues that HCL releases as part of a scheduled software release.

New features in version 12.0

Health check on MariaDB dataSources

User can check the status of MariaDB data sources from Director application.

Known issues

This section describes the known issues in the 12.0 version of Unica Director.

289561	Director: UI gets messed-up after changing timeline view from today to week/month
289824	Director: N number of queries get generated on Process Details Page and UI hangs when flowchart is configured based on Schedule->Select and schedule for 1 month
289908	Locale change not allowed on Environment Add page.
290056	Need to add a new environment if user changed the listener hostname
290120	Not able to shutdown Unica Director server Workaround: If for any reason, the Unica Director server does not get shutdown with Ctrl +C , user can kill the process id to shutdown the Unica Director-server
290121	Addon[Monitoring dashboard] Flowchart created by other/different users are also displayed on flowchart timeline

290122	Flowcharts executed (complete flowchart run / branch) using schedule process box are not supported by the Director software - The user can see the flowchart execution as running all the time and the detailed process execution displays the same process boxes executed repeatedly.
290124	If Campaign and Plan integrated environment is used in Unica Director, then on Cleanup screen on Flowchart logs - campaign projects are listed - but on clicking it nothing happens.
290214	JBOSS Webserver Cluster: Director is not getting status of Campaign Deployments from JBoss cluster
290278	Application deployment start or stop is not supported and user should strictly refrain from doing it when Campaign or Platform is deployed on JBOSS Cluster application server. Doing so may stop your Campaign deployment completely.
290288	CleanUp : Download completed with internal server error and log file is available for download when any DS connection failed
290488	Execution time not showing for flowchart having synchronous trigger
290528	Campaign / Session listing does not works if "Web access control" login method is set in platform
290643	Stop signal not received by Director, causing monitoring GUI messed up
290757	Flowchart shown in running state even for past/future date
290770	Datasource connection is failing if logged in to Director with non asm_admin user
291037	Clean up[temp tables & files for specific file] : Delete button is not moving to disable status and again after clicking on Delete button still it refers to older file when no file is selected.

299049	WebLogic managed deployments like WebLogic controller and server on distributed environments are not supported with Director. Workaround : Mount the Campaign directory from the node-in-use to the administration server on the same absolute path.
N/A	Health check does not show Informix data sources.
N/A	Health check does not capture the memory / CPU utilization of Optimize session processes.

Known limitations

This section describes the known limitations in the 12.0 version of Unica Director.

290173	Unica Director - Migration : Flowchart does not gets migrated , if Campaign / session name is renamed Workaround: If a Campaign or session is renamed, then you must open a flowchart and save it so that the .ses file name is updated as well.
290797	In the 11.1 release of Unica Director, there are no separate ddls available for unicode character support.
	On the Health check screen - in case of the Weblogic application server type - start and stop operations are not supported. User can only see the status of the Campaign Application Deployment.
290384	Flowchart timeline - Flowchart status / statistics incorrect when Active Message Queue is down while flowchart execution happens in Campaign. Solution: Contact Support, if you encounter this issue.

	WAS Cluster / Tomcat cluster deployment related issue - Campaign application down on one node might result in application inaccessible.
	Migration is not supported for Campaigns / Flowcharts created on Campaign and Plan integrated environment.
