# Chapter 1. Director Release Notes

Contains information about new features, defect fixes, and known issues that HCL releases as part of a scheduled software release.

## New features and changes in version 12.1.6

In the last few months, we have been tirelessly working to improve our product and we believe that the new capability and fresh UI of the Director will enhance your experience and help you to enjoy your experience with UNICA's Director even more. Following are the updates you'll find in the latest releases.

### New Features

**ActiveMQBroker** will lay down while installing Director.

**Agent** will be laid down while installing the common installer.

## Fixed Defects

The following table lists the fixed defects in Director 12.1.6

Issue ID	Description
HMA-312558	Director - localization for string "Journey" and "Link" added in flowchart timeline (TVT Required)
